SUMMARY

Software Engineer with experience in full-stack development, specializing in React, Next.js, and Node.js. in developing web applications and participating in hackathons. Strong problem-solving skills with over 500+ DSA problems solved on platforms like LeetCode, GeeksforGeeks and CodeChef. Passionate about building scalable, real-world solutions through clean code, teamwork, and continuous learning.

EDUCATION

Indian Institute of Information Technology (IIIT), Sonapat

Bachelor of Technology in Computer Science and Engineering (CSE)

GPA: 8.5/10

- Currently in 3rd Year, with coursework in Data Structures, Algorithms, Computer Networks, Operating Systems, and Machine Learning.
- Active participant in hackathons, coding contests.

PROJECTS

Learning Management System (LMS) | [Link](#)

- Developed a full-featured Learning Management System with dedicated student and educator dashboards to manage courses, track progress.
- Integrated Google Gemini AI and LLM (Large Language Model) to enable voice-powered search, allowing users to find courses and materials using natural language voice commands, improving accessibility and user experience.
- Implemented Razorpay payment gateway, enabling secure course purchases for students and automated earnings distribution to educators, simulating a real-world revenue model for online education
- Implemented secure authentication, dynamic content rendering, and responsive UI using [mention relevant tech stack – e.g., React, Node.js, MongoDB, Express, Firebase]

Doctor Appointment Booking System | [Link](#)

- Developed a full-stack web application that allows patients to book appointments with doctors based on specialty, availability, and location.
- Designed role-based dashboards for both patients and doctors, enabling doctors to manage their schedule and view patient history, and patients to view upcoming appointments and medical records
- Integrated calendar-based scheduling and real-time availability to avoid double bookings and ensure smooth patient flow.
- Integrated Razorpay payment gateway for online consultation fees.
- Used [tech stack – e.g., React, Node.js, MongoDB, Express] with secure authentication, form validation, and user-friendly UI/UX.

TECHNICAL SKILLS

Languages: C++, C, JavaScript, Python, Java, HTML, CSS

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, FastAPI

Databases: MongoDB, Firebase, MySQL

Blockchain: Solidity, Ethereum, Smart Contracts (Basic)

System Design: High-Level Design (HLD), Low-Level Design (LLD), RESTful APIs, Microservices (Basics)

Developer Tools: Git, GitHub, Postman, VS Code

Libraries & Packages: pandas, NumPy, Matplotlib
