Education

Indian Institute of Information Technology Sonepat 2023 – Present
Bachelor of Technology in Computer Science and Engineering (CGPA: 8.48) *Sonepat, Haryana*

Experience

The AI Signal September 2026 – Present
AI Full Stack Developer Intern

- Working as an **AI Full Stack Developer Intern**, contributing to production-focused web applications and **AI-powered features**.
- Building and improving full-stack applications using **Next.js, React, TypeScript, Node.js, and PostgreSQL**.
- Developing **backend APIs**, integrating AI/LLM capabilities, and working with databases and external services.
- Debugging existing features, identifying root causes, and implementing reliable fixes through **Git-based development workflows**.
- Collaborating on feature development, code reviews, and pull requests while following **clean and maintainable coding practices**.
- Using **Git and GitHub** for branch-based development, bug fixes, code reviews, and team collaboration.

Projects

MultiMind – Production-Grade Multi-Agent AI Platform | *Live* *GitHub* August 2026

React 19, Node.js, Express.js, LangGraph, LangChain, Generative AI, RAG, Gemini, Groq, MongoDB, Redis, Qdrant, Docker, AWS

- **Architected** a distributed **multi-agent AI platform** using **LangGraph, LangChain, and 5 microservices**, orchestrating **8+ autonomous agents** for code synthesis, web search, RAG, and document workflows.
- **Engineered LLM orchestration** with conditional LangGraph graphs, intent classification, and **Gemini/Groq model fallback** for reliable AI responses.
- **Built an end-to-end RAG pipeline** using recursive semantic chunking, **text-embedding-004**, and **Qdrant** for document-grounded question answering.
- **Designed and deployed** resilient backend infrastructure with **API Gateway, Firebase OAuth, Redis rate limiting**, and CI/CD using **Docker, AWS ECS, S3, CloudFront, and GitHub Actions**.

CareerLaunch – AI-Powered Job Portal | *Live* *GitHub* June 2026

Next.js, TypeScript, Node.js, Express.js, MongoDB, Redis, Apache Kafka, Gemini AI

- **Engineered** an **event-driven microservices architecture** with JWT token authentication and granular access controls.
- **Configured Apache Kafka** for asynchronous task distribution alongside **Redis caching layers**, cutting average API latency by **40%**.
- **Integrated Google Gemini AI** to deliver automated **Resume Screening** and career path recommendation engines.
- **Implemented Razorpay** webhooks for transaction handling and **Cloudinary CDN** for secure document parsing and asset storage.
- **Developed RESTful endpoints** and reactive interfaces using **Next.js, TypeScript, and Tailwind CSS**, deployed via automated Vercel CI/CD pipelines.

ALGORISE – Competitive Programming Platform | *Live* *GitHub* February 2026

React.js, Redux, Tailwind CSS, Node.js, Express.js, MongoDB, Redis

- **Created** a full-stack **MERN competitive programming platform** with algorithmic challenges, live leaderboards, and XP gamification.
- **Secured** administrative endpoints using role-based route guards, token revocation, and session handling.
- **Optimized MongoDB indexing and Redis caching**, reducing database query overhead by **60%**.

Competitive Programming Achievements

- **LeetCode Knight (1900+)** with **1110+** problems solved; **CodeChef 4-Star (1800+)** with **300+** problems; **GeeksforGeeks 400+** problems.
- Solved **1750+ Data Structures and Algorithms problems** across competitive programming platforms.
- **Amazon ML Summer School 2026**: Participated in the evaluation track covering **Machine Learning, Deep Learning, and Python**.

Technical Skills

Languages: C++, JavaScript, TypeScript, Python, Java, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit
Backend: Node.js, Express.js, RESTful APIs, WebSockets, Kafka, Microservices
AI & LLM: LangChain, LangGraph, RAG, LLMs, Google Gemini
Databases & Vector Stores: MongoDB, PostgreSQL, Redis, Qdrant, MySQL, Firebase
System Design & Architecture: Low-Level Design (LLD), High-Level Design (HLD), Event-Driven Architecture, Caching Strategies
Core CS: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming (OOP)
